

Introducing the first cloud-based, full integrated attraction photography solution, built on RocketOS

They'll get treasured mementos.
You'll get a reliable revenue stream.
It's a win-win.

With the new **RocketOS photography solution**, you can take control of your attraction photographs.

Increase revenue and improve the visitor experience

RocketOS can help you put a photo system in place that puts dollars back into your organization - not in a 3rd party vendor's pocket. Increase your overall visitor value by owning this popular part of their experience. RocketOS only takes 4%, unlike traditional vendors who may collect more than 80% of your photo revenue.

Average Prices for Printed Attraction Photos

Local	Regional	International
\$20 - 25	\$25 - 35	\$35 - 45

Remove barriers between visitors and their photos

Connect your photo system with ticketing and reservations, online sales, analytics and more to create a seamless experience for visitors and sell more photos. Visitors can log in after they get home and access their photos using their digital tickets or other reservation info!

Supercharge your marketing

Bring guests back to your attraction by using their own photos as powerful marketing assets. Create value-add offers for voucher partners, resellers, and concierge partners. Run your own campaigns with customized coupons and special promotions.

Make attraction photos easy and seamless for your visitors *and* your team.

- 1 Each visitor gets a barcode on their phone or ticket which will be used to manage all their photos at your attraction.

- 2 Whether you're using automated photobooths, on-site photographers, or something else - all visitors need to do is scan their barcode. No matter how many photo locations you have at your attraction, visitors can access them all with one easy scan.

- 3 Visitors can view their photos online, select the ones they want prints of, and more using their unique barcode or reservation information. You can provide them with a unique URL they can use to access their photos for however long you choose.

Leverage your photo system to **reconnect with visitors and bring them back** to your attraction.
